THIS IS UNEVALUATED INFORMATION

1. In Attachment 1 is a list of the departments into which Zeiss is divided, with the breakdown of most of the main departments into their subsidiary divisions and the names of the leading personalities in each such department or division.
2. In Attachment 2 is a diagram showing the chain of command in regard to the major departments,
3. A fairly extensive reorganization of leading personalities is expected to take place in the near future to accommodate the considerable number of specialists and scientists who recently returned from the USSR. On Russian orders, these repatriates are to be given positions in the plant which will in each case be higher than the position held by the repatriate before going to the USSR in 1945 and 1946. This cannot be done without displacing a number of the present occupants of senior posts, many of them reliable SED members, and, as a result, the order has not yet been complied with except in the case of a small proportion of the repatriates, mostly those who did not hold a particularly high position before and can therefore be more easily accommodated with suitable positions now. The names of those who have so far actually resumed work are: Oehler, Rudolph, Haedrich, Schmidt, Kessler, Faerber, Gebauer, Langer, Schuchardt, Anschuetz, and Bauer. The latter is destined to become the head of a new subsidiary department "Foto-Montage".
